MADE 3.8.11 (Hotfix)

Release Notes

MADE 3.8.11

This hotfix addresses an edge-case issue discovered in v3.8.10 to improve stability and data consistency.

General

- Fixed edge case which prevented MADE from opening due to environment library XML character errors.
- Corrected minor display errors introduced by revised RAM metrics calculations.
- Bond response simulation graph now displays as intended.

Syndrome Diagnostics

- Added apiVersion field in SD export JSON.
- Corrected SD export bondType values (reverted to pre-3.8.10 capitalization format).
- Modified SD export final wizard page to make MADE Version and Project File Name fields read-only.

End
